## THE PAPER MONEY MADE

LAST YEAR BY THE BUREAU OF EN-GRAVING AND PRINTING. Certificates, Notes, Bonds, and Revenue

Stamps Turned Out-Expenses of Runnirg the Establishment-Comparison Made Show Economy in Work is In-

Mr. Edward O. Graves, chief of the bureau of engraving and printing, has submitted to the Secretary of the Treasury s report of the operations of his bureau for the past fiscal year. During that period there were delivered to the various departments and bureaus of the government 32,652,207 theets of securities, an increase of nearly 6,000,000 sheets over the quantity delivered in the preceding year. Of United States notes, certificates, and bonds, and national bank notes there were produced 7,184,866 sheets, representing a value of \$138,276,200; of internal revenue stamps. 24,368,700 sheets, containing 600,428,200 etamps; of customs stamps, 314,700 sheets, containing 2,650,000 stamps; and of miscel-laneous securities, 785,941 sheets. The checks, drafts, and similar documents, and a part of the internal revenue stamps are delivered in bound books, of which 77,144

delivered in bound books, of which 27,144 volumes were turned out during the year.

The estimated production on which the appropriation for the year was based was 29,532,550 aheets of securities. The actual production was more than 3,100,000 sheets in excess of this estimate. This arose in part from the delivery after the beginning of the fiscal year of a quantity of internal revenue stamps printed during the preceding year and in part from the printing of more stamps and fewer national bank notes than was anticipated. As the stamps coatless than the notes, a larger quantity of the former than of the latter could be produced for a given sum. But even after making these allowances the showing is a very favorable one.

vorable one.
At the end of October the deliveries of certificates of the three denominations had reached \$47,944,600, of which \$17,915,000 was in \$1 certificates, \$11,195,000 was in \$5 certificates, and \$18,900,000 was in \$5 certificates.

was in \$1 certificates, \$11,193,000 was in \$2 certificates, and \$18,900,000 was in \$5 certificates.

There were delivered during the year \$75,052,000 in United States notes and certificates of the denominations of \$20 and under. No notes or certificates of a higher decomination were printed, although some previously printed were delivered to the treasurer.

The total expenses of the bureau for the past year were \$704,477.90. The net expenditure show an increase over those of the preceding year of \$41,251,88, or only 51 per cent., while the increase in the work turned out is 22 per cent. Of the increased expenditure \$35,710,51, or all but \$5,541,37, was for plate printing, which, being paid by the piece, must increase in cost as the work done increases. Although these results are subject to some qualification by reason of the facts already mentioned as to the increase in the deliveries for 1887, and of the further fact that the expenditures for 1886 contained some items of a permanent nature not properly chargeable to the year's work, enough remains to show a substantial gain in economy over the preceding year, which, in its turn, showed a remarkable improvement in this respect upon any preceding year in the history of the bureau. The estimates for the fiscal 1889 show a large increase over the appropriation for 1888. This increase is due to the greatly increased estimates made by the various branches of the government of the quantity of securities which they will require in that year. These estimates of the amount of work to be done have been adopted without modification as the basis of the estimates of the appropriation to be made. The estimated demand for each class of recutilities for 1889, with the exception of national bank notes, is greatly in excess both of the actual production of 1888. As compared with the current year the increase in the total quantity of securities to be printed is 10,157,255 sheets, or more than 46 per cent. The increase in United States yours and certificates is 3,000,000 sheets, o

notes and certificates is 3,000,000 sheets, or more than 35 per cent, and the increase in internal revenue stampa is 12,743,000 sheets, or more than 52 per cent. The execution of this enormous quantity of work will tax the capacity of the bureau to the utmost. Space for the performance of the additional work can be found in the building occupied by this bureau only by the use of laborsaving machines in all of the processes owhich they are adapted. The estimates were accordingly mare on the assumption that a large part of the additional printing will be done on eteam plate printing presses. that a large part of the additional printing will be done on steam plate printing presses. Six machines of the kind known as the "Militgan" press have for a number of years been used successfully in printing certain varieties of green internal revenue stamps. During the last fiscal year six improved machines of this pattern were introduced and applied with signal success to the printing of the backs of the one and two dollar silver certificates. All of the tie printing of the backs of the one and two dollar silver certificates. All of the one-dollar backs printed since Jan. 21, 1887, and all of the two-dollar backs printed since April 29, 1887, have been printed on these presses in a style fully equal to that of work of the same class done on the hand roller presses. The great increase since the beginning of the present fiscal year in the demand for internal revenue stamps has led to the purchase, within the last two months, of six presses, with still further improvements, on which to print a part of the cigar stamps. The difficulties incident to the introduction of all new mechinery had to be contended with at first, but they have been overcome and a large part of the stamps of this class are now being printed on the steam power presses. Without the aid of these pressess, which are now in full and successful operation, it would have been impossible to meet the demands of the internal revenue bureau for this class of work.

The appual saying from the use of steam.

work.

The annual saving from the use of steam presses will then be \$149,000, and the ag gregate work performed by 210 printers working on the two kinds of presses will be equal to the product of the labor of at least 335 men working on hand presses alone, a number for which it would be quite impossible to find room in the building, to say notbing of the impossibility of securing the additional number of competent workmen.

The estimate for 1880 as compared with

The estimate for ISSO as compared with the appropriations for the current fiscal year is \$1,152,915.

A comparison of the quantity of work proposed to be done in 1889 with the quantity produced by a like expenditure in former years shows a great gain in economy. The expenditures in 1882 closely approach the estimated expenditures in 1889. In that year the net expenditures in 1889. In that year the net expenses of the bureau, omitting certain items now charged to separate appropriations, were \$1,083,000. The number of sheets of securities turned out was, bowever, only \$3,380,746, while the estimated production for 1889, with an expenditure increased less than 0 per cent, is \$1,150,050 sheets, an increase of more than 53 per cent.

53 per cent.
The number of persons employed on July
1, 1889, was 530. At the date of the last
report the number had run down to 817 in consequence of the slackness of work in the earlier part of the fiscal year. A subseconsequence of the slackness of work in the earlier part of the fiscal year. A subsequent increase in work caused a slight increase in the force, which at the close of the fiscal year stood at \$41. Ninety-one persons left the service during the year, of whom 94 were discharged for misconduct, inefficiency, or absence without leave, 53 voluntarily resigned, 8 were transferred to other rolls, and 6 died. Thirty former employes were recalled to the service, and 63 original appointments were made. In consequences of the increased appropriation and the additional work to be done, the force has been considerably increased since the beginning of the present fiscal year. The number now employed is 802-253 leas than on March 1, 15-5, although the work has in the meantime greatly increased. A table in the appendix shows that the average cast of 1,600 sheets of securities has been reduced from \$34.21 in 1855 to \$24.33 in 1857, while the average number of sheets produced for each employe has run up from 24,005 to 38,872.

A comb of unusual severity which I took last autumn developed into a difficulty decidedly estarthal in all its characteristics, threatening a return to my old chronis maialy, estarth. One bottle of Ely's Cream Balm completely eradicated every symptom of that painful and prevailing disorder.—E. W. Wansen, 160 Hudson street, Rochester.

For twenty years I was a sufferer from catarth of the head and throat. By a few applications of Ely's Cream Balm I received decided benefit—was cured by one bottle.—Charlotte Parker, Weyerly, N. Y.

WASHINGTON ATHLETIC CLUB An Organization that Proposes to Provide Healthful Sports.

One of the institutions that this city h hitherto lacked is now well under way with everything in its favor. The Washington Athletic Club has been organized and it proposes to supply the respectable youth of the city with bealthful gymnastics of all kinds without attempting to wreck their

kinds without attempting to wreck their pocketbooks.

A REPURICAN reporter called upon Mr. A. F. Childs, president of the club, and asked him what their plans and prospects were. "We have," said that affable gentlo man, "a first class start and a very pleasant outlook. The public knew nothing of our organization a week ago and yet we have nearly a hundred applications for membership in already. It is really surprising to see how many respectable young men are desirons of joining the club."

"Does the club intend making a specialty of any particular branch of muscular development," saked the reporter.

"No; we shall try to cover as much ground as possible. In our club house we shall have a gymnasium of the most modern description, and there will also be billiard and pool tables for members. We expect to locate our park in the course of a week or so, and shall at once commence to make it ready for the coming spring. In the park it is our intention to make a four-lap bleyele track, several tennis courts, a "diamond" for base ball enthusiasts, and a rifle range. Other minor attractions will also be provided, and everything that an athletic club should have will be ours. Boating will, of course, be a great summer attraction, and this will be duly attended to."

"When do you expect to commence operations"

"I suppose we shall know more definitely by to-morrow night. There will be a meeting of those interested in the tea room of Willard's Hotel at 7:30, and we want everyone who is interested to attend and join our family circle."

Secretary Kelley informed the reporter that he had tssued a call for a meeting to-

family circle."

Secretary Kelley informed the reporter that he had issued a call for a meeting to-night at Willard's Hotel, and said he was desirous of having as many members and interested persons present as possible.

MANY LADIES PARTICIPATE In the Dinner Given by the Six o'Clock Club.

The second meeting of the Six o'Ctock Club was held at Willard's Hotel last evening. About fifty members sat down to dinner. There were boutonnières at each ing. About fifty members sat down to dinner. There were bontonnières at each cover, which many of the men fastened upon their coats, with the thifoil wrappers prominently displayed. The subject for discussion was, "What shall the government do for the people?" Public Printer Benedict acted as chairman of the meeting, supported by Secretary of the Ciub Croffut upon cue hand and Commissioner Colman on the other. Rev. Robt. Nourse made the opening address pertinent to the question in a wittyand trenchant manner. Others who spoke were Mr. Simon Wolf, Mr. W. C. Dodge, Judge Hildebrand, Judge Holden, Col. Williams, of the treasury; Mayor Morrison, of Fall Church; Mr. Johnson, of the light house board; Col. Lincoln, and Mr. Murphy. Mr. Croffut read the secretary's report, and Col. W. F. Morse, the treasurer's report of the last meeting. Others present were Col. Henry C. Dailey, Dr. Walker, Mr. Wm. Dennis, Mrs. Groffut, Mrs. Morse, Mrs. Lincoln, Mrs. Bertha Lincoln, Mrs. Jordan, Mrs. Berker, and Mrs. Simon Wolf. The men each paid \$i for their dinner and \$i cach for the ladies they took there, and paid extra for wine and cigars, It is true they were permitted to enjoy the remarks of the speakers on the subject under discussion. Membership that secures the reception of a postal card bearing the subject for next meeting costs a fee of \$5. Commissioner Colman, of the agricultural department, presides at the next meeting a week hence.

CHILDREN'S CHRISTMAS FEAST. Will be Given This Year on Innocents' Day.

A number of benevolently inclined ladies met yesterday at 1800 F street, at 11 a. m., to reorganize the Children's Christmas Club. Mrs. Webb announced that there

Club. Mrs. Webb announced that there was a balance of \$150 in bank, which was available for the regular children's Christmes dinner, which will this year take place in the National Rifles' Hall on Innocents' day, Dec. 28. The coat of last year's din her was \$500.

The following committees were an nounced: Dinner-Mrs. F. M. Barber, Mrs. J. M. Wilson, Mrs. C. S. Noyes, Mrs. Van Reypen, and Miss. Solomons. Amusements—Mrs. J. F. Coyle, Mrs. Woodhuli, and Mrs. Adec. Toys and gifts—Mrs. C. C. Willard, Miss Douglass, and Mrs. R. W. Allen. Tickets and invitations—Mrs. A. B. Hagner, Mrs. Ecoch Totteo, and Miss. Strong, Ways and means—Mrs. C. S. Noyes, Mis. Judge Wilson, and Mrs. Webb. Badges—Miss Solomons.
Contributions of clothing will be gladly received by Miss Strong, 1411 H. street Suitable toys or presents can be left at Mrs. C. C. Willard's, corner of Fourteenth and Patreets, while cash contributions may be left at word the daily newspaper office.

Patrets, while cash contributions may be left at any of the daily newspaper offices or with Mrs. Webb, 1800 F street.

The next ladies' meeting will be held in the red parlor of the Ebbitt House at 11 o'clock on Thursday next.

Children who desire to assist in making the digner a success are reconsted to be at the dinner a success are requested to be at the Franklin school building at 2 p. m. or Saturday next.

Some Suggestions for Prof. Nourse EDITOR NATIONAL REPUBLICAN: An edit torial in the Evening Star asserts that the Panama canal will be a failure and in the closing paragraph s ates: "The United States has an eminent right to demand a thorough overhauling of the present all ministration by the De Lesseps company." Having some knowledge of internationa law I have looked in vain for any possible law! have looked in value for any possible authority on the part of our government to haul M. de Lesseps over the coals for any precumed dereliction in misappropriating or misapplying French capital at Panama. Some two years ago Prof. Nourse gave your readers a warning, and especially our legislators, that our government should by no means attempt the construction of the Nicarsgua canal, then a government right under treaty with Nicarsgua, alleging as a reason that the Panama canal was an assured success, and we should how to a foregone conclusion. Will now the learned professor now show your readers that M. de Lesseps has not misappropriated the French funds intrusted to him, or that he has not misapplied them, and had he even done so that it is quite beyond the province of our government to investigate Lesseps or his chasil? These gloomy alterations of the probable failure of the Panama canal should at once be dented by the professor, and thus put a stop to the waste of American money in a value attempt to construct a canal, with locks, via Lake Nicaragua, in the hope of companying with Lesseps and anal, with locks, via Lake Nicaragua, I be hope of competing with Lasops's sevel canal, as heretofore so ably expenses "American Pansma canal syndicate," Its functions, and its asserted endownests, will be not favor the public with a statement concerning it, as well as the other points referred to?

A B.

WASHINGTON, D. C., Nov. 30, 1887. Four Men Burned to Death. BROOKVILLE, KAN., Dec. 1,-The Lawrence, one, six stores, and three dwallings, all frame buildings, were desirayed by fire at an early hour this morning. Four men—Foreman Brimes, and Brakeman Harigan, of Wangay, Ken. Mr. Farnsworth, of Lincoln, Kan., and an unknown man—were burned to death.

AFTER THE CONVENTION.

Delegations From Other Cities Seeking It is quite evident that the efforts to be put forth by the citizens of this District to secure the meeting here of the Republican and Democratic presidential nominating conventions does not deter other cities from continuing their efforts to attain the same object for themselves. Prominent politicians have been working judividually for weeks to locate the conventions in Philadelphia. New York, and other places, and as the time draws near for the meeting of the Republican National Committee in this city additional pressure will be brought to bear to succeed in some one of these projects. St. Louis will probably be the first to put in appearance, and has already an advance guard on the ground to keep the folks at home posted. Mr. A. C. Wildlicombe, chairman of the Republican state central committee of Missouri, arrived bere several days ago, and has already put in some good work. The committee, numbering between twenty five and fifty of St. Louis most prominent citizens, with Gen. Henderson at their hearl, will arrive bere early next week, and the law work of log rolling will be entered upon in earnest, for by that time they will have committees from other cities to meet and contend against. The committee has accepted the invitation of the Republican National League to enjoy the bospitality of the League, and as the National Republican Committee has also accepted a similar invitation this social intercourse will doubtless prove advantageous to the St. Louis people, but whether they can win or not remains to be seen. The League will play no favorites in the matter, beyond striving to have the District selected for the meeting of the convention, but all visiting delegations will be invited to epipy its handsome bome and be welcomed as royal guests. The national committee will hear all applicants and the reasons why their requests a rould be granted and in the end will do as they have done heretofore, decide according to their judgment. The members of the League were none too soon in opening their quarters, and will find, if they have not already, that it is just what is needed for the party. It will become a meeting place for the leaders and and Democratic presidential nominating conventions does not deter other cities from continuing their efforts to attain the same

ALEXANDRIA MATTERS.

Items of Interest Gathered for the The many friends of Capt. J. V. Davis,

who was former superintendent of the federal cemetery here, will be glad to learn that he has been transferred back to this city by an order issued from the War De-

that he has been transferred back to this city by an order issued from the War Department dated Nov. 28.

Mr. John T. Cox, the agent for the National Republicant in this city, has removed his place of business to the southeast corner of Washington and King streets.

The residents of upper Prince street were yesterday startled by the announcement that one of their neighbors, Mrs. Mary A. Merchant, had been found upon the floor of her residence, face downward, dead. Coroner Powell was summoned who, after making a diognosis of the case, pronounced it death from heart disease, and stated that in his judgment she had been dead about forty-eight hours. Mrs. Merchant is well known, and has many frlends who will regret to learn of her sad and sudden death.

The annual meeting of the Charlottesville and Rapidan Railroad Company was held in this city yesterday afternoon at the general office of the Virginia Midiand railway. Col. L. W. Reid was elected president and J. S. B. Thompson secretary and treasurer. The annual report showed that the company had paid the interest on its bonded indebtedness and had also relieved \$0.900 of the principal, leaving outstanding \$462,500, of which \$7,200 will be retired on Jan. 1, 1888.

Mr. J. I. Vance, the newly elected minister of the Second Preshylerian Churen of this city, arrived here on Tuesday last. He will enter upon his ministry stones.

Mr. Samuel Wimsatt and James II. Loh, of this city, who were sent to Prince William county by the Cooper agency for Virgitia coupons in this city, were arrested and placed in jail for vending coupons, out were afterward brought out on a writ of habeas corpus. Both gentlemen, it is learned, will sue for damages.

WAITING FOR CONGRESS.

The Bull Leaders Apathatic - The Market Heavy and Weak. NEW YORK, Dec. 1,-The stock market to-day was dull except for a few stocks, and by the operations of the bears and room traders, who are again ranged on that side, was kept heavy to weak for most of the day. The princicipal factor in the decline

day. The princicipal factor in the decline was a rumor of a strike on the Reading, which being circulated in London, was reflected in the early cables, which made an excuse to open this market down.

The buil leaders were very apathetic, but there was considerable buying on a scale down, and it is believed that very little long stock came upon the market. Most operators seem to be waiting for developments in which the meeting of Congress may have much to do. In the atternoon the rumors in regard to Reading met with official denial, and other favorable developments started a covering movement which carried some few stocks to the best figures of the day, but the advance culminated before the close, though the gains were well held.

Prices were generally heavy to weak at

Prices were generally heavy to weak at the opening, and further losses were sustained in the early trading, after which the list became a feature by reason of its unusual strength, but the general list was barely steady. After a further slight decline in the afternoon the list rallied, though the grangers for small fractions only, until the last bour, when fair progress was made in the unward direction, and the close was steady to firm, generally at fractions under the opening figures.

steady to firm, generally at fractions under the opening figures.

Money on call has been easy, ranging from 3 to 5½, last loan at 4, and closing offered at 3. Sterling exchange is dull and steady. Actual business at 481½ for 60-day bills, and 48½ for demand. Posted rates 483 to 486. Government bonds dull and steapy to firm. State bonds very dull and featureless.

Treasury ba ances—Coin, \$130,704,229; currency, \$10,900,373.

The following were the closing bid quotations:

Currency, \$10,900,273.

## Domestic Fire Engine and Pump Company,

INCORPORATED SEPTEMBER 19, 1887. General Office, 938 F Street N. W., Washington, D. C.

Sole Manufacturers of

## Morrell's Barrel Fire Engine and Bucket Force Pump.

PATENTED SEPTEMBER 18, 1883, AND MARCH 9, 1886.

The Morrell Barrel Fire Engine is unequaled for convenience of handling, durability, and fine throw of water. It can be operated by three persons, and will force a linch stream of water to a distance of \$5 feet. The Morrell Bucket Force Pump, besides being of use in extinguishing incipient lines in houses, barrel, afore, and manufactories, is invaluable as a means of washing windows, sidewalks, floors, and carriages, and for watering grounds and flowers in the shortest possible time. As a means of ejecting chemical or other fluids into poultry houses, among grape vines, and fruit trees, for the purpose of destroying vermin and insects, it has no superior. His construction is simple, being merely the attachment of a first-class force ump to a versel shaped like an ordinary bucket, but much stronger and perfectly water tight. But three feet of rubber hose are used, with which a stream of water can be thrown 40 feet.

## TESTIMONIALS.

Diana, Sansonn Co., Darota, Feb. 27, 786.
Mr. Robert Morrell, Submit, New Jarsyl-Dran Sir; Last summer the skating rink in this placeburned down. The wind, being in the right direction, carried the flames into the business part of the town, and the rook of many buildings caught fire so that they blazed, but with two of your Barrel Fire Engines we saved the town. We had 75 feet of hose attached to each machine, and they worker so satisfactorily that we would not take \$500 for them, if others could not be obtained. Very respectfully,

J. C. Whitting, Dist. Attorney.

M. N. SEVEN, Sheriff.
SANSON & HOWELL, Hardware,
M. C. Thisson & Co., Machinery,
I. L. Brenathessen, Merchaut.

And eighteen others.

From the Titusville (Pa.) Herald of Apr. 23, '85 ]
For the second time in two years the Commercial Hotel was discovered on fire last Sunday ovening. Being as dry as a tinder box the fames spread with the greatest rapidity, and woold undoubtedly have destroyed this building and the whole of the business part of town had it not been for the prompt appearance of two of Morrell's Barrel Fire Engines, the pow-

esful work of which seen extinguished the fire before much loss occurred. This is the third time the e engines have saved the town, and too much cannot be said in their praise. CENTERVILLE, PA., June 18, 1855.—I have owned a Morrell Fire Engine for a year, and have twice saved our town with it. Every insurance man in these parts is advocating these engines. My insurance on stock is but 114 per cent., while my unprotected neighbors are paying 234 per cent, for similar property.

Dry Goods, Groceries, Boots and Shoes, Furniture and Crockery.

OFFICE FARIBAULT WIND MILL CO., FARIBAULT, MINN.—We believe Morrell's Bucket Force Fump to be one of the best fire extinguishers we have ever seen. When the elevator burned we think these pumps had as much to do in saving our shops as the steam fire engine itself. During the fire the engine gave out, and these pumps kept our shops and adjoining buildings wet down until the engine was in running order again, and in overy case where we have seen them tried they have done equally as well.

STEWART & WINTER.

OFFICE OF CHIEF ENGINEER FIRE BEFARTMENT, FARIHABLY, MINN,—ROBERT MORRELL, BEG.—DEAR SIR: We use your Bucket Force Funips in our fire department, and consider them well adapted for extingishing fires, either at the outset of the fire or in buildings where the firemen are unable to reach with larger streams. Yours respectfully.

ordinary bucket.

G. H. PALNIER, Chief Fire Department.

CENTERVILLE, PA., Oct. 7, 1887.—ROBERT MOBRELL, ESQ., SUMMIT. N. J., DRAR SIR: We had
a bad fire here recently, and but for the Morrell Englines there would have been a loss of
about twenty thousand dollars. The fire insurance adjuster was here this morning. He
said that at Franklin, Pa., where they have
water works, they could not have saved the
buildings we did.

J. A. ROBIER, DT GOODS, &c.

OFFICE OF JAMES MCMILLAN & CO., DEALERS

OFFICE OF JAMES MCMILLAN & CO., DEALERS, IN DRY GOODS, GROCERIUS, &c., MARK, LIZERNE CO., PA.—DDAR SIR—There is no hand pump made that requires less fixing to keep in order than your ball valve Bucket Force Pump. I use it for washing wagous, sprinkling fruit trees, emptying cisterns, and washing fruit trees, emptying cisterns, and washing wallows; in fact, it is indispensable about a place like mine, and would not be without it for twice its value. Respectfully yours.

JAMES MCMILLAN,

Arrangements have been made to manufacture the Morrell Barrel Fire Engines and Bucket Force Pumps in large quantiles to fill existing orders and meet future demands. The sale of these machines will be vigorously pushed in all sections of the United States. One thousand shares of the capital stock of this company (which consists of 10,000 shares of the par value of \$20 each, and which are non-assessable) will be sold, in lots to suit purchasers, at \$5 per share. Applications for stock or machines should be made to
